

Ranu Gupta

Senior UI Developer | React.js & Angular · TypeScript | Full-Stack (Python / FastAPI)

the.ranu.gupta@gmail.com | +91-9901969903 | linkedin.com/in/ranu-gupta-551438159

PROFESSIONAL SUMMARY

Senior frontend engineer with 9 years building responsive, scalable web applications in React.js and Angular. Owns frontend architecture and design-system work, leads technical design discussions, mentors developers, and runs code reviews. Strong with TypeScript, React Hooks and Context API, and state management across Redux Toolkit, Zustand, and NgRx. Backs the frontend with production Python (FastAPI) REST services on AWS, so UI teams aren't blocked waiting on APIs. Works AI-augmented daily with Cursor AI, Claude, and GitHub Copilot, and reviews the output for correctness, security, and performance before it ships. Comfortable driving accessibility (WCAG 2.1), internationalization, and CI/CD alongside QA and DevOps.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), Python (7+ years), HTML5, CSS3

Frameworks & Libraries: React.js (v17+/v18 — functional components, Hooks, React Router), Next.js, Angular (v16+); FastAPI, Node.js, Express

State Management: Redux / Redux Toolkit, Zustand, React Context API, NgRx

Forms: React Hook Form, Formik

UI & Styling: Tailwind CSS, Material UI, Ant Design, shadcn/ui, Bootstrap, AG Grid; responsive design

Rendering & Performance: SSR / SSG / ISR, React Server Components, code splitting, lazy loading, memoization, Micro-Frontend Architecture

Data Visualization: D3.js, Chart.js

APIs: REST API design, GraphQL integration

Accessibility & i18n: WCAG 2.1, internationalization (i18n)

Testing: Jest, React Testing Library, Cypress, pytest; TDD / BDD practices

CI/CD & DevOps: Git, pull requests & code reviews, GitHub Actions, Jenkins, GitLab CI, Docker, Kubernetes (basics)

AI-Augmented Dev: Cursor AI, Claude, GitHub Copilot (daily) — multi-file feature generation, debugging, architecture scaffolding

Cloud: AWS (S3, deployment), Azure (basics), GCP (basics)

Auth & Security: JWT, OAuth2, role-based access control, healthcare-grade data handling

Databases: PostgreSQL, MongoDB

PROFESSIONAL EXPERIENCE

Cigna | Senior Full-Stack Developer

React, TypeScript, FastAPI, Redux Toolkit, AWS · Remote · Jun 2025 – Feb 2026

- Led frontend architecture for the member portal: React functional components with Hooks, Context API, and React Router, backed by a shared TypeScript design-system library (shadcn/ui, Material UI) adopted across feature teams.
- Built accessible (WCAG 2.1) member dashboards with Redux Toolkit and server-side rendering, and set responsive-design and UI/UX standards used across the app.
- Owned code reviews and mentored mid-level developers on component patterns, state management, and testing.
- Delivered secure login and registration end to end with JWT/OAuth2 and role-based access control, backed by FastAPI REST services validating eligibility, claims, and appointment payloads (async/await, Pydantic) on AWS.
- Used Cursor AI, Claude, and GitHub Copilot daily to scaffold multi-file features and tests, cutting delivery time roughly 30% while reviewing output for security gaps and performance regressions.
- Held quality with Jest and React Testing Library on the frontend, pytest on the backend, Docker for local environments, and a GitHub Actions pipeline.

FIS Global | Software Development Engineer II

React, Next.js, Angular, TypeScript, Tailwind CSS · Bengaluru, India · Nov 2018 – Apr 2025

- Built and shipped enterprise web applications in React and Next.js, and contributed Angular modules within a micro-frontend setup shared across teams.
- Cut page load time about 30% and lifted engagement about 20% through memoization, code splitting, lazy loading, and SSR/SSG.
- Built reusable UI components and form flows with React Hook Form and Formik, and standardized data grids on AG Grid across dashboards.
- Added internationalization (i18n) and accessibility improvements to customer-facing applications.

- Designed REST and GraphQL APIs and data models with backend teams, and integrated third-party APIs and payment gateways.
- Worked with QA and DevOps on automated testing (Jest, Cypress, React Testing Library) and CI/CD through Jenkins and GitLab CI.

Time Inc. | Software Development Engineer I

Angular, Material UI · Bengaluru, India · Mar 2017 – Oct 2018

- Delivered responsive Angular applications, improving user interaction about 25%.
- Built 12+ reusable Angular UI components, cutting development time about 30%.
- Partnered with designers to ship pixel-perfect, accessible UI.

KEY PROJECTS

Cigna Healthcare Member Portal · React, TypeScript, Design System, FastAPI

- Defined the component architecture and a shared, accessible (WCAG 2.1) design-system library in TypeScript (shadcn/ui, Material UI) adopted across feature teams; migrated the build to Vite for faster iteration.
- Built JWT/OAuth2-secured, role-based dashboards with Redux Toolkit and SSR, backed by FastAPI endpoints reading from PostgreSQL and MongoDB.

Digital Banking & KYC Verification · React, Next.js, Formik, OCR

- Built KYC form flows with React Hook Form and Formik plus custom validators for complex nested data, cutting submission errors about 40%.
- Built an OCR pipeline (Google Vision API, Tesseract.js) that reduced manual verification time about 70%, and improved load times about 35% via lazy loading and route guards.

Transaction Monitoring Dashboard · React, AG Grid, D3.js, Chart.js

- Built a real-time dashboard on AG Grid for 50+ banks, surfacing anomalies about 50% faster across 1M+ daily transactions using D3.js and Chart.js.
- Optimized API calls and caching to bring data load under 200 ms.

EDUCATION

RGPV University · B.E., Electronics & Communications · Gwalior, India · Aug 2012 – May 2016

AWARDS & RECOGNITION

- Recognized for exceptional contributions to frontend architecture.
- Recognized for web performance optimization, reducing load time by 30%.
